

Instant MES Buffer

Catalog Number: EXBR031

info@exreprotein.com

For Research Use Only. Not Intended for Diagnostic or Therapeutic Use.

Product Description

Instant MES Buffer simplifies preparation of 2-(N-Morpholino) ethanesulfonic acid (MES) buffer with easy to dissolve powder granules to prepare a 1 Liter, 1X working solution. It does not require additional calculations or pH adjustments to help reduce errors and maintain consistent buffer preparation.

The 1X solution is 50 mM Tris, 50 mM MES, 1 mM EDTA and 0.1% SDS (pH 7.0±0.2 at 25°C) . MES is a commonly used running buffer for Sodium Dodecyl Sulphate-Polyacrylamide Gel Electrophoresis (SDS-PAGE), especially for the electrophoresis of small to medium molecular weight proteins with the Bis-Tris system.

Available sizes: 10 Pack or 50 Pack.

Limitations

- For Research Use Only. Not Intended for Diagnostic or Therapeutic Use.

Precautions

- Always wear appropriate protective clothing and follow safe laboratory procedures.

Storage

Store unopened packs at 10-30°C for up to 36 months.

Preparation of Reagents

1. Transfer instant powder granules from 1 packet of Instant MES Buffer to a beaker.
2. Pre-dissolve the granules by slowly adding 500 mL distilled or deionized water to the beaker, allowing the 1-5 minutes for the granules to completely dissolve while gently stirring with a stirring rod or magnetic stir bar.
3. Transfer the dissolved solution to a volumetric flask and bring up the volume to 1000 mL by adding distilled or deionized water, which is a 1X working solution.
