

## Instant PBS-T Buffer

Catalog Number: EXBR039

info@exreprotein.com

For Research Use Only. Not Intended for Diagnostic or Therapeutic Use.

### Product Description

Instant PBS-T Buffer simplifies preparation of Phosphate-buffered Saline with Tween® 20 (PBS-T) buffer with easy to dissolve powder granules to prepare a 1 Liter, 1X working solution. It does not require additional calculations or pH adjustments to help reduce errors and maintain consistent buffer preparation.

The 1X solution is 137 mM sodium chloride, 2.7 mM potassium chloride, 10 mM phosphate, and 0.05% Tween 20 (pH 7.4±0.2 at 25°C). PBS-T buffer is a commonly used buffer in ELISA and Western blotting immunoassays, and is often used as a wash buffer, as well as for preparation of blocking buffer and antibody dilution.

Available sizes: 20 Pack or 100 Pack.

### Limitations

- For Research Use Only. Not Intended for Diagnostic or Therapeutic Use.

### Precautions

- Always wear appropriate protective clothing and follow safe laboratory procedures.

### Storage

Store unopened packs at 10-30°C for up to 36 months.

### Preparation of Reagents

1. Transfer instant powder granules from 1 packet of Instant PBS-T Buffer to a beaker.
2. Pre-dissolve the granules by slowly adding 500 mL distilled or deionized water to the beaker, allowing the 1-5 minutes for the granules to completely dissolve while gently stirring with a stirring rod or magnetic stir bar.
3. Transfer the dissolved solution to a volumetric flask and bring up the volume to 1000 mL by adding distilled or deionized water, which is a 1X working solution.

Tween is a registered trademark of ICI Americas, Inc.
